

The anti-vibration needle scaler is a pneumatic tool specially designed for inter-pass cleaning, rust removal, and stripping of metal surfaces. It is also ideal for easily removing welding slag from MMA and MAG welds. With an innovative vibration-reduction system, it offers exceptional manoeuvrability and handling comfort, while also considerably reducing shakes and jolts. The compact, lightweight design and streamlined construction make it easy to operate in restrictive conditions.

Features	
Impact rate	4300 strokes/min
Needle stroke	34 mm
Air pressure	min 6.2 bar
	max 8.6 bar
Air consumption	85 L/min
Needles	Number x 19
	Diameter 3 mm
	Length 180 mm
Weight (including needles)	1.6 kg
