

LAMPO CUT EVO

PROFILE RAIL

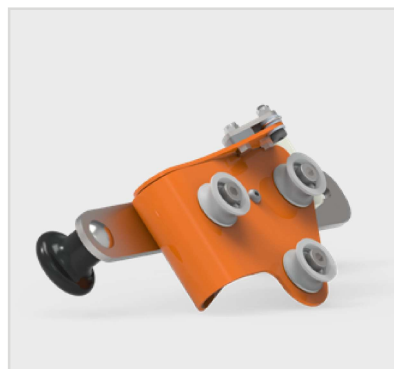

Special profile rail, high resistance structure with rubber inserts:

- no scratches on the surface
- more stability during the cut

CONNECTIONS

With the Cutting Track Joint Kit (art. SP70041) it is possible to easily connect two or more products.

CARRIAGE

It is robust and comfortable to use with 3 nylon sliding pulleys with 3 ball-bearings.

SLIDING BLOCK

A flexing sliding block in polypropylene ensures the linearity of the cutting.

HANDLE DESIGN

New 2-handed handle with a graduated slot for adjusting the cutting pressure.

SOFT CASE

Supplied with a soft case which, thanks to a pair of wheels, makes transportation easy and safe.
