Touchscreen Dial V1 EU EU | SEA | CIS

Versatile dial switch with multi-device, scene control, and personalized display.

· A smart switch that can intuitively control practically any smart home device by rotating a dial with haptic feedback. It is equipped with a 1.32" round touchscreen, a temperature-humidity sensor that can be used as an external sensor for your thermostat, and also a mmWave presence sensor. It works over Wi-Fi, and can connect to third-party ecosystems via HomeKit, Matter or cloud integrations.
