Hub M3 [Global]

Next-generation Matter hub for Aqara and third-party devices with a focus on Edge Computing

· The Hub M3 prioritizes privacy and local automations, which can now function without the internet or even the hub itself.

· It features versatile connectivity, including dual-band Wi-Fi and PoE, as well as a 360° IR blaster that can link your AC to Matter and adjust it based on real-time room temperature from the Climate Sensor.

· As a powerful multiprotocol hub, it seamlessly integrates Aqara and, for the first time, third-party Matter devices, serving as a central point for smart home automation while ensuring privacy and easy setup.

| Hub for Aqara and Third-Party Devices | Edge Computing and Local Automations | IR Blaster with Feedback and Learning | Superior Wired and Wireless Connectivity | Focus on Privacy and Encrypted Storage | Easy Installation and Flexible Placement | Powerful Speaker and Custom Ringtones |
