

MINI TURBO™

The Arbortech Mini TURBO™ is a universal wood shaping blade that can be used to create different shapes, profiles and finishes in small to medium sized woodworking projects. Designed to provide the same functionality as the TURBOPlane™ with a smaller blade size, attached to a shaft to enable carving in hard to reach places. The Mini TURBO™ provides additional versatility with its ability to be transformed into an effective sanding tool.

- Extended reach enables carving of **deep internal profiles**
- Leaves a **smooth finish** requiring **minimal sanding**
- Limited side exposure improves **safety**
- Perfect for free-formed **convex** and **concave shapes**
- **Tungsten carbide teeth** are rotatable and replaceable
- Can be used with **guides** and **templates for accuracy**
- Can be transformed into an **effective sanding tool**
- Attaches to standard 115mm (4 ½") and 125mm (5") angle grinders
- Blade also fits on the Arbortech Mini Carver™
- Works best with **Power Carving Unit™**

Power Carving Unit System
